## OBJECTIVE

Seeking a summer 2021 internship in computer science, in either front-end or back-end

## EDUCATION

**Texas A&M University**, College Station, Texas August 2018 - May 2022  
Bachelor of Computer Science, Minor in Business  
Cumulative GPA: 3.55  
Classification: Junior (99 hours)

## HONORS

**Lauren '02 and Christopher Zugaro '02 Scholarship** August 2018 - Present  
• Academic Scholarship in the Computer Science department  
**Distinguished Student Award** December 2020

## RELEVANT EXPERIENCE

**Web Developer** February 2021 - Present  
• Maintain the current webpage at the Carter-Sowell research lab at Texas A&M. As well as develop a new modern website to be used to gain research grants.  
**Engineering Teaching Assistant** August 2019 - December 2020  
• Instructed engineering students in introductory software engineering implementations through python.  
• Installed important teaching skills such as analyzing code quickly and adapting positive, but applicable feedback in a straightforward manner.

## PERSONAL PROJECTS

[strimi](#) October 2020 - Present  
• A website that creates a social media platform that centralizes where people talk about what they watch and what they listen to with their friends in a like-minded community.  
**Covid-19 Tracker** June 2020 - July 2020  
• Tracks Covid-19 cases, recoveries, and deaths for every country on a simple web page that includes a map, graph, chart, and stats. It was created by using JavaScript React, and the Material-UI package for the front-end interface.  
[Personal Webpage](#) August 2020 - Present  
**Blackjack Game** May 2020 - July 2020  
• A player vs. computer blackjack game that offers a simple interface for card images, sounds, a table to keep track of wins/losses/draws, and a gambling component. I used this program to help me learn HTML, CSS, and Javascript.

## TECHNICAL SKILLS

Efficient: Python • JavaScript • CSS • HTML • C++ • Java • React • Bootstrap
